

Contents of Volume 26 (1992)

Vol. 26, No. 1

E.L. Hallebone: Use of typologies for 'measuring' self-identity change: methodological issues in longitudinal qualitative research	1
T.F. Liao: A modified GMDH approach for social science research: exploring patterns of relationships in the data	19
J. Goyder, J. Lock, and T. McNair: Urbanization effects on survey non-response: a test within and across cities	39
M.A. Groves: Beyond spatial representation	49
M.S. de Vries: Stepwise multi-criteria evaluation	61
B. Mevorach: What makes the clock tick? Time, populations, voters, and votes for the president in the United States	77
<i>Notes:</i>	
A. Glazer and B. Grofman: A positive correlation between turnout and plurality does not refute the rational voter model	85
K. Brännäs and U. Zackrisson: On forecasting of innovations	95

Vol. 26, No. 2

N.D. Uri and J. Wilson-Mixon, Jr.: Effects of U.S. equal employment opportunity and affirmative action programs on women's employment stability	113
J.M. Batista-Foguet and W.E. Saris: A new measurement procedure for attitudinal research. Analysis of its psychometric and informational properties	127
R. Popping: In search of one set of categories	147
H.-P. Blossfeld and A. Hamerle: Unobserved heterogeneity in event history models	157
A. Smaling: Varieties of methodological intersubjectivity – the relations with qualitative and quantitative research, and with objectivity	169
R.B. Smith: Action embedded in social structure: a systematic theory. Part I, theory and evidence	181
R.B. Smith: Action embedded in social structure: a systematic theory. Part II, explanations	205

Vol. 26, No. 3

B. Burchell and C. Marsh: The effect of questionnaire length on survey response	233
P. Neijens, J.A. de Ridder, and W.E. Saris: An instrument for collecting informed opinions	245
K.D. Bailey: Globals, mutables, and immutables: a new look at the micro-macro link	259
V.V. Shvyrkov: The sample estimation	277
P. Valois, G. Godin, and R. Bertrand: The reliability of constructs derived from attitude-behavior theories: an application of generalizability theory in the health sector	291
P. van den Eeden: Multilevel theory and the underspecification of multilevel models	307
M.J. Holler: Nash equilibrium reconsidered and an option for maximin	323

Vol. 26, No. 4

Vesna Lužar, Vesna Dobrić, Siniša Maričić, Greta Pifat, and Jagoda Spaventi: A methodology for cluster analysis of citation histories	337
Joseph Woelfel and George A. Barnett: Procedures for controlling reference frame effects in the measurement of multidimensional processes	367
Aharon Tziner: A comparative examination of structural models of ability tests	383
Theo van Tilburg: Question sequence effects in the measurement of reciprocity	395
Robert M. O'Brien, William J. Burns, and Paul Slovic: The effects of sampling on measures of association between variables based on sample means	409
<i>Notes:</i>	
Elliot Noma: Determining implied relationships on incomplete ordinal data	427
Robert A. Stebbins: Concatenated exploration: notes on a neglected type of longitudinal research	435
Author index	443
